

1. Boxes availability: no need to procure and stock boxes of different sizes - boxes are created unique to the products being packed - in realtime

2. Less warehouse space required - only cardboard sheets

3. No risk of not having the correct size blanks in stock

4. Reduced material costs since box is custom made according to product being shipped

5. Dramatically reduce or eliminate the need for filler materials

6. Less environmental impact

7. Increased packaging productivity and efficiency through automation

8. PACKVERTIZING

CMC CARTONPACK

Variable boxes on demand for complete automation

PC ADD CONTROLLER

PC ADD is CMC developed Line Controller available in all main international languages for:

Document handling

CMC **VARY-TOTE**®
AN AWARD WINNING TECHNOLOGY

CMC CARTONPACK

Variable boxes on demand
for complete automation

CMC Cartonpack can dynamically pack multiple items (different shapes and sizes) in a perfect size box. Core of the system is the Vary-Tote, a CMC designed and patented transport tote that features two inner adjustable guides which are used to compact the picked items to the minimum possible volume and define dimensions of the order, thus the final box.

Processable Products

Different size multi items orders and odd shaped products

Books
Photoalbums

Electronics

Fashion

Automotive
Spares

Stationary

Cosmetics,
Beauty
Pharma

Toys/Games

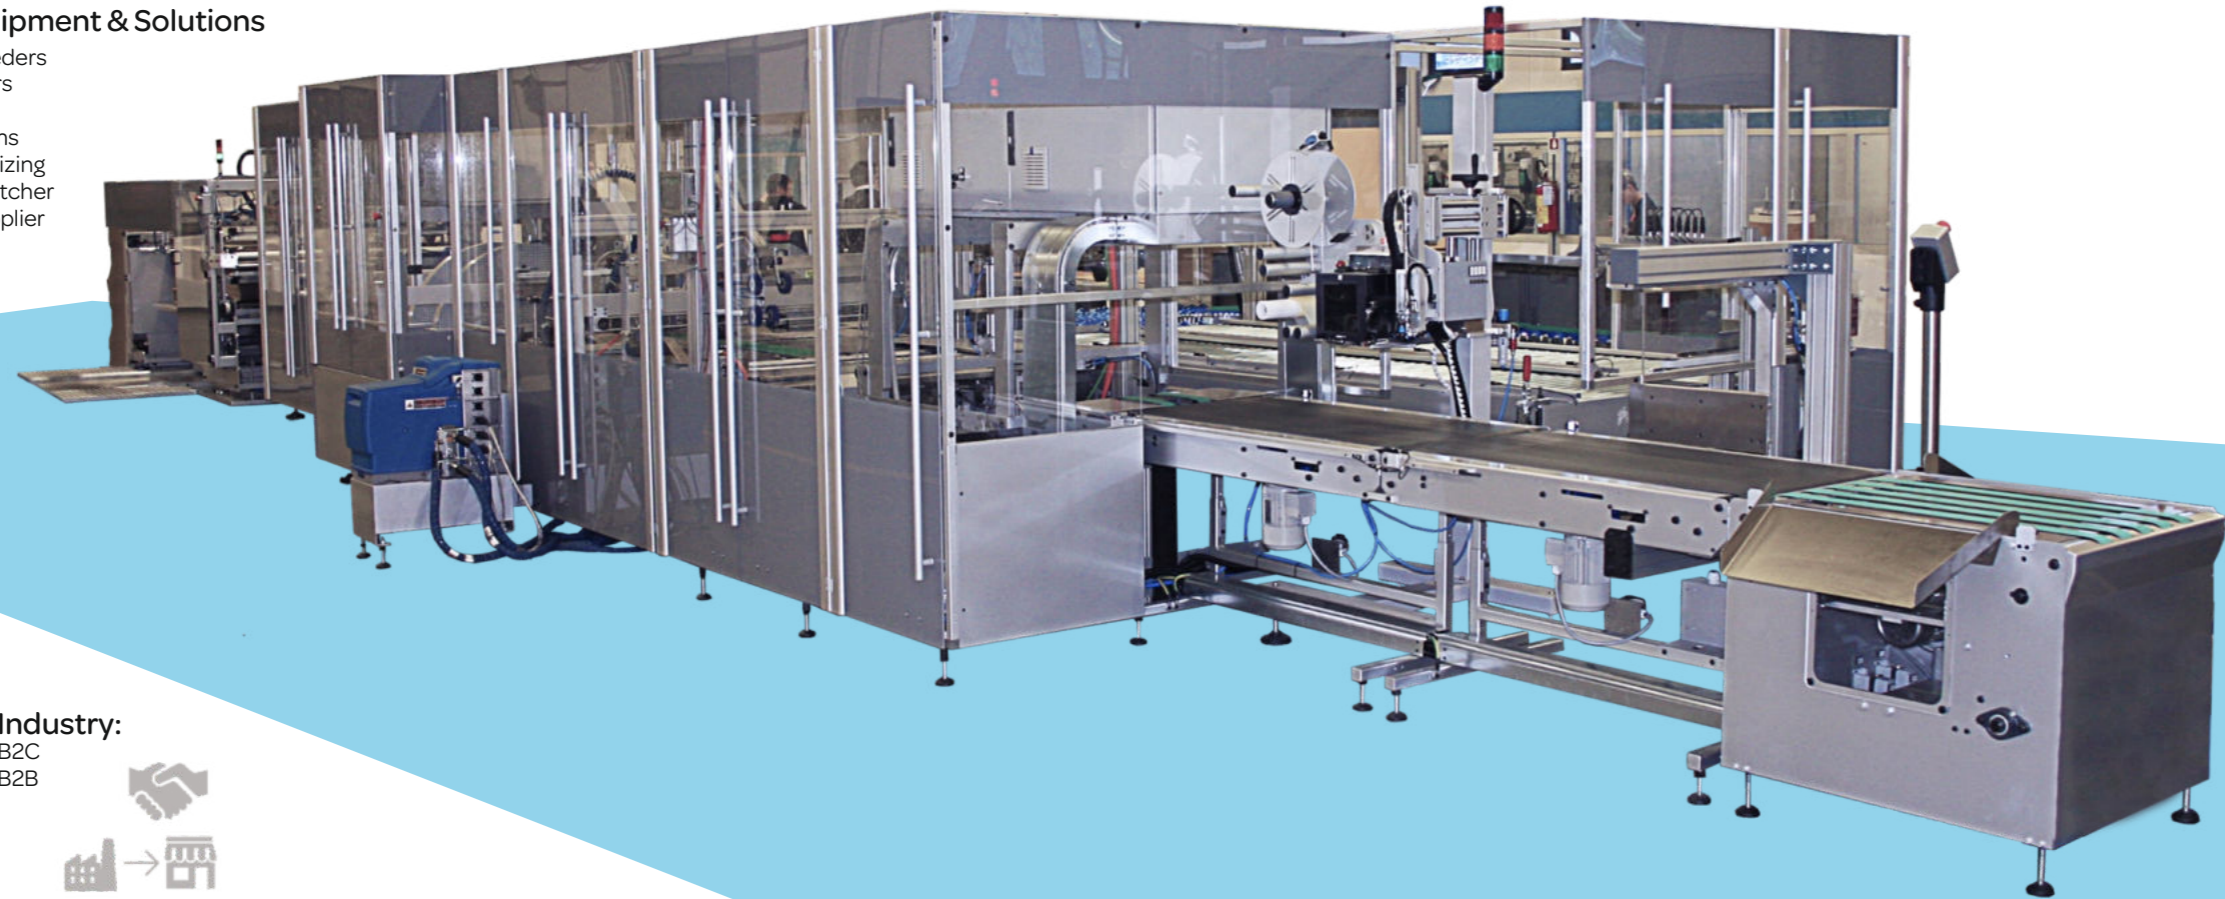

Food/drinks
